

Card Sale with Tip

If you work in the service industry (bar, delivery, restaurant, transportation), the most common transaction is a purchase with an additional tip, where the client uses their credit or debit card as the method of payment.

NOTE This procedure is available only if you activate the *Add Tip Option* option.

To process a sale with tip:

1. Use the number pad to enter the sale amount.
2. Touch **SALE**.

\$12.34

SALE

3. Hand the terminal to the client so they can select a pre-set tip amount, input a manual tip amount (\$) or percentage (%), or select **NO TIP**, and they confirm the total amount.

NO TIP

4. Client inserts, swipes, or taps their payment card.
5. When the terminal receives the response, the screen displays the result. To print the customer receipt, touch **Print** or **None** if the client does not want a transaction receipt.

Where would you like to receive your receipt?
